CAI to Package Howden Steam Turbines

Corona, CA — Corona, California based Combustion Associates Inc. (CAI) is pleased to announce its collaboration with Howden, whereby CAI will package Howden's steam turbines into complete power generation systems at its Corona, California manufacturing facility.

The steam turbine generators will join CAI's Spirit™ line of gas turbine packages allowing the Company to offer complete steam turbine packages from 200kW to 10MWe.

Both companies will collaborate on distributed energy opportunities with a focus on markets in developing countries.

Howden has been manufacturing steam turbines for over 90 years in Germany. The Company is the premier choice for sub 10MWe projects. Howden steam turbine product line includes condensing applications, backpressure applications and extraction/condensing applications.

CAI has been serving clients in the U.S. and internationally for 25-plus years. It specializes in the engineering, manufacturing and packaging of cost-effective and energy-efficient modular or stationery power generation systems and complex process systems. The company's signature product is the Spirit™ line of 1MW – 25 MW gas turbine generators. These modular, skid-mounted, plug-n-play units are ideal for on-site distributed power, island mode or connection to the grid.

CAI's export achievements are widely recognized with numerous awards including the President's "E" and "E" Star awards (2016 and 2011.) President Barack Obama himself singled-out CAI's export contribution at the U.S. –Africa Business Forum in 2014. [See video](#)

"We are very happy to join hands with a company of Howden's calibre to package their steam turbines for power generation applications. These systems will address the needs of our clients especially where access to clean fuel and reliable electricity is challenging," said CAI President Ms. Kusum Kavia.

Howden Steam Turbine at the heart of CAI's 200kW to 10MWe power generation packages.

ABOUT CAI:

CAI is a minority, woman-owned small business that provides cutting-edge engineering and advanced manufacturing solutions to the energy, process and environmental industries worldwide. It specializes in power generation systems that are cost-effective and energy-efficient as well as in skid-mounted automated process equipment and environmental solutions. It's signature product is the Spirit™ line of power generation systems that come in 1MW – 25 MW packages. CAI's products are engineered, manufactured and tested at its state-of-the-art facility in Corona, California.

Over the years, CAI has significantly expanded its exports and global customer base allowing it to deliver products and engineering services anywhere in the world. The Company has provided solutions to clients in the U.S., Canada, China, Belize, Benin, Nigeria, Cameroon, China, Kazakhstan and Bangladesh.

CAI's export achievements have been widely recognized with numerous awards including the President's "E" and "E" Star awards (2016 and 2011), Exporter of the Year Award for Sub-Saharan Africa by the U.S. EXIM Bank (2009) and National Minority Person of the Year Award (2008) by the U.S. Small Business Administration. President Barack Obama himself singled-out CAI's export contribution at the U.S. –Africa Business Forum in 2014. [See video.](#)
